

China-Japan Tangshan Caofeidian Eco-industrial Park

Construction : Administrative Committee of China-Japan Tangshan Caofeidian Eco-industrial Park

Location : Tangshan City

Area : 6000 ha

Cooperative design : Division of Environmental management & Policy of Tsinghua University, Sojitz Corporation

China-Japan Tangshan Caofeidian Eco-industrial Park, having an area of 60km², is located in the central area of Caofeidian Industrial District (310km²). The world's first challenge in this project is to develop a demand-response network: companies share raw and waste materials to create a positive economic impact and increase environmental efficiency.

Both disaster prevention system built in the park and beautiful environment with abundant water and greenery create harmony among business, people and nature, which will establish a strong brand as the most advanced eco-park in the world.
