

## Plan for Ningbo East New Town, Ningbo Urban Planning Bureau

**Ordering party :** Ningbo City Town Planning Office

**Location :** Ningbo City, Zhejiang, China

**Summary :** Area 1500 ha, New town planning

**Services :** Conceptual planning and detailed planning for the underground space

This project is a new town planning carried on by the Ningbo City, China, which includes a new CBD construction planning. In this project, EDAW took charge of the development of the aboveground planning and Nikkei Sekkei Civil Engineering, of the underground space planning.

For this project, we designed the underground road and the underground walker network to promote the walker-centered urban development and to realize the conservation of a comfortable urban environment with the aboveground square and the park.

Additionally, the bus terminals and the underground market were located around the subway station to promote the utilization of the public transportation system, realizing a convenient and conformable transport interchange city. For the CBD district where needs a lot of parking space, the parking space network was established to reduce the aboveground traffic volume and to use the parking space effectively.

The design of the subway and the road construction are in progress after the approval of the government.
