(Serve as disaster prevention green forest)
 - Administration building
(Serve as disaster prevention warehouse)
 - Earthquake resistant water reservoir, bench with furnace, pergola, emergency toilet

Services : Basic design

Completion of design :

- Basic design : March 2007
- Detailed design : March 2009

The "Asahi Bunka-no Mori Park" is built in the Asahi cultural zone with a disaster protection function.

The Asahi cultural zone with the total area of 14ha is near the central urban district in the Asahi City and located 700m southwest from the Asahi station on the Sobu Honsen. There are Toso culture center and Prefectural Tobu library on the south of the Jingyoku River. The development area of the park with 8ha is located on the north of the Jingyoku River.

The basic and detailed design for the park was performed with the following three key concepts:

- (1) Having the function of disaster refuge place in large area and the various disaster-prevention facilities
- (2) Creating a cultural zone appropriate to the name of [Bunka- no-Mori]
- (3) Creating a symbolical open-space.
