- Square 2 District Park: 1,200m²

Completion :

- 2006 (Square 2 District Park)
- 2008 (Square 1 District Park)

In the ongoing model project for land readjustment of the Yachimata City with an aim to create new features of hometown, two district parks that serve as a gateway for the Yachimata city, were built at the northern part of the Yachimata station on the Sobu Hosen.

Because of the Yachimata City' s historical background that had produced "Wild Horses" for the Japan' s feudal government until the Edo period, the parks were designed with cultural and historical elements incorporated, under the theme of "Wild Horses" that people can enjoy

The parks were built under the theme of two scenes where wild horses were used to live as follows: "Fountain of Forest" for Square 1 District Park and "Grass Pasture" for Square 2 District Park to bring back the old pasture scene of Yachimata City by "Wild horse objects" located in these parks
