- Effective width of the passage  
6.2m (2nd floor), 9.3m (3rd floor)
- Elevating facilities: Elevator : 1 unit, Escalator :  
4 units ( Up &Down )

**Services :** Basic design, Detailed design

**Completion :** January 2010

In the first class urban redevelopment project for the south area in Ichikawa Station, the following facilities are built at the area of about 2.6ha to support the life of the citizens:

- (1) Residential houses: 1000 units  
(For installment sale and lease)
- (2) Commercial facilities, etc.
- (3) Administrative service center
- (4) Library
- (5) Child-support facilities
- (6) Congregate housing
- (7) Station plaza
- (8) Event space
- (9) Two-tier pedestrian deck to connect two buildings.

Station plaza, event space and the pedestrian deck, with an abundance of greenery, serves as a base of the Ichikawa green network as well as a place of recreation and relaxation.
