- ↔ Industrial corridor
- BacNinh central
- Intelligence creation & Business center
- Gate city
- Farming villages

Spatial development plan up to 2030

Ordering party : Bac Ninh Province, Vietnam

Main Contractor : T.A.T Consulting & Construction Company Ltd.

Location : BacNinh Province

Service : -Development vision planning up to 2050

-Orientation for regional spatial development up to 2030

Project site area : 822.7km²

Planned population : 1,440,000 in the year 2030 (Urban area: 720,000, Villages: 723,000)

Planned time of construction : 2012

The project site is situated 25km northeast from Hanoi central. It plays an important role in Vietnam as a historic site with its cultural heritages as well as a core of the industrial corridor leading economic development of Northern Vietnam.

The project is to plan a new urban network system to create a sustainable city. Especially, industrial and tourism promotion areas are considered as important hubs of the development, so the spatial development policy was made as follows:

Industrial area: Modification of existing chaotic development plan as a result of rapid industrialization in recent years

Tourism promotion: Establishment of development policy of natural, cultural and historical resources of the province and planning of water transportation network for tourists
