

## Detailed urban planning for North coast of Ming River in Fuzhou

**Ordering party :** Fuzhou City

**Location :** Fuzhou, China

**Project summary :** Subcenter (total 110ha)  
(plaza space, offices, commercial facilities, cultural institute, residences, metro station)

**Services :** Detailed planning and urban design

**Time of services :** October 2009 to December 2010

We developed this plan to produce a subcenter of Fuzhou, the central city of Fujian Province.

Two-storied large plaza is placed along Ming River, the biggest river in Fuzhou city, and multi functional facilities such as 500m-high skyscraper building, offices, commercial facilities and cultural institutes are located around the plaza.

Transportation system including metro links and solid crossing road is also needed to reduce possible traffic jams. We provided guidelines to produce sophisticated human scale city here.
